Visa[®] requires debit card issuers to participate in the Visa Account Updater (VAU) service.

Visa[®] Account Updater is a communication system for card issuers (such as Manville Area FCU) to communicate account changes to network acquirers who can then provide participating merchants with current account data so that recurring payment transactions can continue to be completed. This process ensures that account updates resulting from any changes to the debit card (such as a new account number) will be communicated to the merchant.

You can opt-out of the service. If you wish to do so, please complete the below form and return it to Manville Area FCU:

I wish to opt out of Visa[®] Account Updater service for my MAFCU Debit Card. I understand it will be my responsibility to notify any merchants who maintain my card information on file for recurring debit payments with any updated account information.
